CROTCH

TM

CROTCH™

Crotches are very rare in any timber specie. Crotches are veneers with "flame" pattern of grains that form an extremely decorative character for interiors. This character is derived when a trunk or heavy branch with two forking branches is cut through its collective center.

RARE CHARACTER

Crotch veneers are to be derived from rarely occurring trees with two forking branches and thus making it extremely difficult to locate.

UNIQUENESS

Crotch veneers invariably have unique flame patterns of highly decorative character.

American Ash Rustic

American Red Oak

American Walnut Puima

American Walnut Puima Panello
