

NON-REPEATABLE TEXTURES

"Feel" veneers bring in a fresh approach to textured veneers where we infuse naturally occurring patterns onto veneers. This approach maintains our specialty of retaining the "Natural Look" in veneers. The textures infused onto panels vary in its content due to the material used. As opposed to standard designed textures, natural materials in its varied forms are used to lend natural textures onto natural veneers. Designing ends with material selection, nature then continues... by imprinting one of its forms onto another.

Feel veneers showcase natural textures that are non repeatable and hence makes every piece of furniture unique.

FUSION OF NATURAL MATERIALS

Veneers are fused with unique materials occurring in nature.
